

EVS Project Exhibition by F.E. students:- 2018-19

A EVS project exhibition by FE students was held on 13th October 2018 on "Renewable Energy Sources, Solar Thermal technologies, and Sustainable Development" from 8: 30 to 10 am, organized by Dr Ashutosh Valavade in the Applied Physics Lab. Students displayed projects like Solar tracker, Solar lantern, Prototype of the Vertical and Horizontal wind mill, Arduino based motion detection, raspberry Pi based motion detection, solar distillation, and solar concentrator based water heater. A unique project which got everyone's attention was the Biodiversity at XIE, displaying the photographs of different collection of birds, insects and flowers at XIE campus. The exhibition was visited by the Director Fr (Dr). John Rose S.J., Principal Dr Y.D. Venkatesh, Administrator Fr Fabian Barretto, HoDs of all departments and faculty members. Everyone appreciated the projects and the efforts taken by F.E. students.

Some photographs of the event.
