

REPORT

Under the mentoring activity for FE students, Mr Prateek Bajaria, PhD Research scholar, VJTI, was invited for a talk on “Applications of Differential Equations in Engineering” on Monday, 11th February 2019 in LH3. Prof Madhavi Parimi, HoD, AS&H Dept. introduced the speaker.

Mr Prateek’s talk was for 1hr duration for FE div A and B students. The basic idea of the talk was to build awareness about the applications of differential equations. His talk spanned applications across the streams of EXTC, Computer Engineering and Information Technology. Through interactive videos and various examples, he briefed students of the vast applications where the equations could be applied. The students were benefitted by gaining insights into the topic, beyond the academic curriculum.

Prof Shilpa Dingankar thanked the speaker by presenting a memento.
