

Guest Lecture on “Electrochemistry”

DATE: 19/04/2022

The Department of Applied Science and Humanities had arranged for Guest lecture for students of FE (All branches).

The resource person was *Dr Hemant Khanolkar* from Applied Sciences and Humanities Department, *Fr. C. Rodrigues college of Engineering, Bandra, Mumbai.*

No of students who attended the lecture were 103.

Topic of the session was “*Electrochemistry*”. The Professor highlighted the different types of Electrodes, cells, potentiometers and their applications in the Electric Engineering field. It was a very informative session focusing on the basic knowledge of the Electrochemical series and Galvanic series and the use of precious metals in metallurgy. He also answered the queries raised by students in an explicit manner towards the end of the session. They were satisfied with the contents of the presentation and they actively participated in the session.

A *Feedback* was received from the students based on the session via Google form at the end of the session.

The session was very helpful to the students who will be appearing for FE examination conducted by MU in June – 2022.
