

Allyn Samachar

Vol. 2 Issue no. 5

April is a season of purpose, perseverance, and quiet victories. As the days grow longer and the world bursts into bloom, we're reminded that growth takes both patience and boldness. In the words of Rupi Kaur, "If you were born with the weakness to fall, you were born with the strength to rise." This month teaches us that strength isn't just loud—it's also found in the steady rhythm of showing up, pushing through, and staying true to our journey.

April celebrates the spirit of learning, leading, and living fully. It's a time where deadlines test our discipline, projects reflect our passion, and small moments of joy offer balance amid the rush. Whether it's presenting innovative ideas, preparing for exams, or finding peace in solo adventures, every experience becomes a thread in the fabric of our becoming.

Bhanavi Pandey (TE CSE)

April was a powerhouse month for Bhanavi, marked by a beautiful balance of professional experience, academic achievement, and personal joy. As an active participant, host, and volunteer at INNOVISION 2025, Bhanavi played a key role in shaping the success of one of the biggest events of the year. Her hands-on involvement provided invaluable experience in event management, team coordination, and public interaction. Meanwhile, her ongoing internship at Shadowfox allowed her to apply classroom knowledge to real-world tech scenarios, deepening her industry readiness. On the technical front, she reached a milestone in her mini-project—a blockchain-based Evidence Protection System, a noteworthy accomplishment showcasing her dedication to innovation. Despite a packed schedule, Bhanavi made time for herself, enjoying a fun bowling night with friends and treating herself to a peaceful solo movie date, proof that balance is not only possible but essential.

Rebecca Celine Sam (SE COMPS)

For Rebecca, April came and went in a blur of productivity. With second internal tests starting early in the month, she was quickly immersed in academic life. Juggling project files, subject assignments, and practical exam preparation, she handled the academic crunch with grace and persistence. Amid the chaos, she found a moment to breathe and reconnect with loved ones during a joyful Easter celebration. That pause, filled with warmth and reflection, helped her reset and recharge. Rebecca ended the month feeling grounded and accomplished—having faced every challenge with resilience and a renewed sense of purpose.

Shravni Bandodkar (SE COMPS)

April was a standout month for Shravni, filled with effort, creativity, and well-earned success. Her team's participation in the CSX SE Mini Project Exhibition was a clear highlight, where they not only showcased their innovation but also drew inspiration from peers. What made the experience truly special? Their project paper was successfully published, marking an exciting academic achievement and setting a strong foundation for future research endeavors. Amidst exams and deadlines, Shravni's enthusiasm for learning shone through, leaving her feeling inspired and more determined than ever.

Anjali Prashant Walekar (SE CSE)

April was defined by academic dedication for Anjali. With the end of the semester approaching, she dived deep into her studies, focusing on internal assessments, documentation, and viva preparations. Her hard work paid off as her group successfully completed their mini-project: an AI-Powered Agricultural Yield Predictor, thoughtful and impactful solution addressing real-world agricultural challenges. With vivas completed and her project well received, Anjali wrapped up April with a strong sense of fulfillment and readiness for the final stretch of the semester.

Anushree Verma (SE CSE)

Walking a parallel path with Anjali as part of the same project group, Anushree also poured her energy into their AI-based mini-project, seeing it through from conception to successful completion. Her commitment to growth extended beyond academics; she stayed consistent with her daily LeetCode practice, sharpening her coding skills and pushing toward personal goals. Anushree's ability to balance multiple demands with focus and grace was truly inspiring. Her April was not just productive—it was a testament to the power of persistence and self-discipline.

Riya Kamble (BE IT)

Riya's April was a culmination of hard work, dedication, and academic achievement. She successfully appeared for her IAT examinations, demonstrating her continued academic commitment. Riya also represented her institution at an inter-college project competition held at K.J. Somaiya College, showcasing her technical capabilities and collaborative spirit on a larger platform. One of the most significant milestones this month was the completion of her major project, a key academic requirement that she fulfilled with excellence. She meticulously created her blackbook, documenting the entire process with clarity and professionalism, and actively participated in the major project presentation, where she effectively communicated her work and outcomes.

April reminded us that when passion meets perseverance, the results are always inspiring. Here's to stronger bonds, bolder goals, and even brighter achievements in the months to come!

"The most common way people give up their power is by thinking they don't have any"

– Alice Walker
