

Allyn Samachar

Vol. 2 Issue no. 8

Ed. I - Jul '25

**"Our greatest
weakness lies in
giving up. The most
certain way to
succeed is always
to try just one
more time."**

Thomas Edison

July is a time to embrace fresh beginnings, fuel our curiosity, and keep moving forward with determination. As Aristotle once said, *"We are what we repeatedly do. Excellence, then, is not an act, but a habit."* This month reminds us that consistent effort, paired with passion, leads to remarkable progress. It's a moment to recognize how far we've come while staying committed to what lies ahead.

Innovation thrives when we challenge ourselves to learn, create, and explore. From diving into cybersecurity and AI projects to excelling in academics, sports, and cultural events, our community has shown that growth comes in many forms. Each achievement—big or small—reflects the dedication and resilience that define us.

July is more than just the start of another semester or project; it's a reminder that every

July is more than just the start of another semester or project; it's a reminder that every step we take builds the foundation for greater success. This month, let's celebrate our wins, nurture our talents, and continue shaping the path toward our dreams. The journey has just begun, and the best is yet to come.

Alvina Parmar (TE-CSE)

Alvina is delighted to share that she achieved a pointer of 9.87 in her 3rd semester and was honored on stage during Convocation 16 for this accomplishment — a truly memorable moment for her.

Beyond academics, she won first prize in the singing competition organized by the Women Development Cell, providing a wonderful opportunity to showcase her passion for music. She also secured second prize in Sparx along with her team in Kabaddi, reflecting her active participation in sports.

For fun and relaxation, she participated in the dance event at Spandan, which proved to be both refreshing and joyful.

These diverse experiences have greatly contributed to her personal and professional growth, blending academic excellence with creativity, teamwork, and passion.

Disha Gupta (TE – CSE)

She also embarked on an exciting journey with IBM's *"Learner to Builder: AI Architect"* program, where she earned a badge and certificate during the Self-Learning Week. This experience provided her with valuable exposure to real-world AI applications and strengthened her motivation to explore further.

On the academic front, Disha stepped into the new college year with a fresh mindset, grateful to reunite with old friends and excited about what lies ahead.

Every step this month has brought her closer to her goals, and she remains thankful to the Allyn community for fostering growth, sharing, and mutual support.

Anushree Verma (TE – CSE)

The month of July was all about momentum for Anushree — continuing with good habits, diving deeper into academics, and exploring new tech interests. She is proud to share that she cleared her driving test this month, finally earning her license.

She also remained committed to her daily LeetCode streak, ensuring her coding skills stay sharp and continually improving.

Anjali Walekar (TE – CSE)

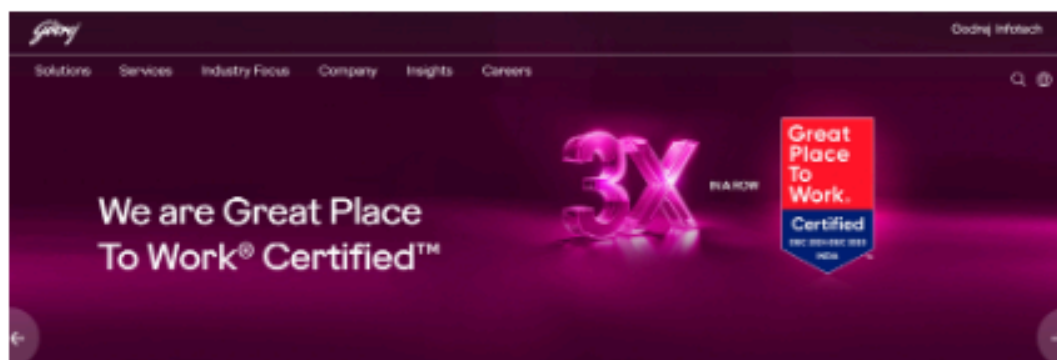

Anjali is currently working on a personal cybersecurity project, which is still in progress as she fixes a few bugs. The process has been a valuable learning experience, and she is excited to complete it soon. She has also completed 44 rooms on TryHackMe, gaining strong practical knowledge and hands-on experience in cybersecurity.

Passionate about the intersection of Artificial Intelligence and Cybersecurity, Anjali is actively exploring AI tools and technologies. For her mini-project, she and her team have chosen a topic that combines both fields — detecting steganography using deep learning — and they are eager to dive in and create something impactful.

Bhanavi Pandey (BE – CSE)

Bhanavi enjoyed a two-day trip to Khopoli with her friends, where they had a great time playing various games like darts, pool, and more. Alongside this, she has been working on a major project with her team, currently in the process of selecting the best idea from three proposed options. She is also pursuing a MySQL course on Scaler to strengthen her database skills.

In addition, Bhanavi has been actively preparing for placements at Godrej Infotech. After clearing the first round of their exam, she has been shortlisted for the second round, which will be conducted at their campus.

Shravni Bandodkar (SE COMPS)

Shravni began her new semester with a sense of enthusiasm and excitement, eager for a fresh beginning. She is currently working on a mini project that is helping her explore new ideas while learning interesting subjects that have sparked her curiosity.

Beyond academics, she recently enjoyed a family outing, which served as a refreshing break and a wonderful experience. This phase has been both productive and enjoyable for her, blending learning with memorable moments.

Cecilia Dinesh (BE – COMPS)

Cecilia recently appeared for two placement drives and has been actively preparing for them. She is currently working on her major project, strengthening both her practical and academic skills.

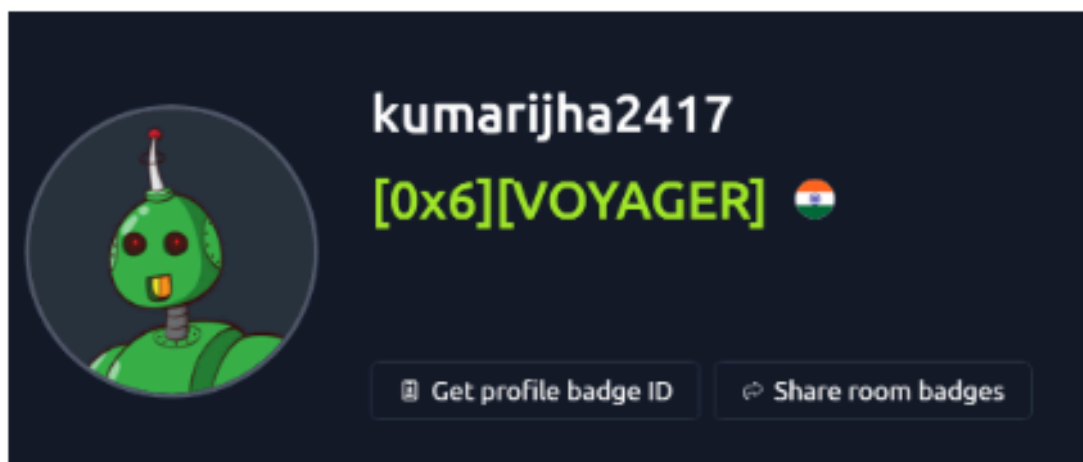

She also secured a strong pointer in both the Honour course and Semester 6, which has further motivated her to keep pushing forward in her final year.

Kanchan Kumari (TE – IT)

A new chapter has begun for Kanchan as college reopens, and she is truly excited to enter this phase with fresh energy and focus. This semester includes a few of her favorite subjects — ones that genuinely spark her interest — and she is determined to give them her best.

Recently, she has been immersing herself in the world of cybersecurity, exploring various cryptographic techniques and their real-world applications. She has also completed 27 rooms on TryHackMe, sharpening her practical understanding of ethical hacking and security concepts. Alongside this, she is learning new programming languages to strengthen her technical foundation.

Between academics and tech, Kanchan also enjoyed spending time with nature, finding it refreshing and rejuvenating.

The first edition of the July Newsletter celebrates the remarkable achievements of these talented individuals. Their passion, hard work, and relentless pursuit of growth serve as an inspiration to us all. Here's to new milestones, exciting journeys, and even greater successes in the days to come!

"The beginning is always today"

– Mary Shelley
