## **FIVE WAYS YOU CAN MAKE THIS WORLD A BETTER PLACE**

We long for a kinder world, a caring world, a safe world, a world in harmony. We look into the eyes of strangers and hope they see in us a person who cares. How can we be a part of a change? A change for which the majority longs if it were safe to let it be known. Individuals seeking joy and a purpose for their lives Where do we start? Let's look at few simple ways to make the world a better place.

### **1)Develop a Forgiving Spirit**

Forgiveness builds a platform on which to build accord and community. Help others by forgiving rather than reacting with hatred. Learning to keep a cool head, having a forgiving spirit, and developing a controlled tongue are the building blocks of negotiations and the prospect of future accord. This constructs a platform for future understanding and growth.

## **2)Be Generous with Compliments**

Even a stranger appreciates and responds to a genuine compliment. Just a sincere complimentary remark on one's appearance, on an observed uplifting action or of an observed kindness shown to someone. A pervading warmth is shared when a sincere compliment is voiced. And the compliment affirms the behavior addressed. We all benefit and flourish in that atmosphere. Let us be free with sincere compliments: this brightens the day for us all.

## **3)Be Kind to Others**

The point in being kind is not just to pay back a kindness, but to pass it on. Of all the things you can be in this life, choose being kind as the most essential, the one with the most impact. People will forget what you said, people will forget what you did, but people will remember how you made them feel. Kindness is like gold. It is priceless and the supply is never exhausted. It is ours to use and share and be comforted in its worth.

#### **4)Volunteer in Some Effort**

Nothing promotes an atmosphere of community, of good feelings, and of friendship more than volunteering. For every hour we volunteer or for every penny we donate, we receive a thousand-fold in satisfaction and brotherly love. Until you participate as a volunteer, you will never know the rewards.

#### **5)Be Dependable**

A good reputation, whether it be in business or in your personal life, takes a lifetime to build. It can be destroyed in five minutes. Do your business and conduct your personal life in such a way that those who know you best would find it difficult to believe a degrading rumor about you. An army of these people of good repute can change our world. We should protect our reputation as we build character. People of integrity better our world. Let us seek to be that type of person.
