LATEX (pronounced lay-tek) is a document preparation system for producing professional-looking documents, it is not a word processor. It is particularly suited to producing long, structured documents, and is very good at typesetting equations. It is available as free software for most operating systems.

A one week course on “LaTeX for Beginners” was organized by, IT departments of Xavier Institute of Engineering for SEIT, TEIT and BEIT students from 21st February 2022 to 4th March 2022.

This Course on Latex of one week covered both theory and hands-on sessions on various aspects of Latex.
